7. Who is a General Physician?

A general physician (GP) is a medical doctor specializing in non-surgical adult healthcare. They treat various diseases not requiring surgery, encompassing conditions affecting the cardiovascular, respiratory, neurological, haematological, endocrine, and gastrointestinal systems. Some GPs may further specialize within these systems.

8. What are the educational requirements to become a General Physician?

General Physicians, also known as primary care physicians, require completion of medical school and a subsequent residency in primary care. Prerequisites include a science-based bachelor's degree, a minimum GPA, and foundational medical training. A three-year residency commitment is mandatory.

9. When should I consult a General Physician?

Consult a general physician for a wide range of health concerns, including cardiovascular, respiratory, musculoskeletal, neurological, gastrointestinal, and endocrine issues. General physicians provide primary care for non-surgical conditions. They are the first point of contact for most health problems.

10. Do General Physicians offer home consultations?

General practitioners (GPs) provide comprehensive healthcare, including physical examinations, immunizations, and treatment for various medical conditions across all age groups. Home consultations are at the GP's discretion; however, routine check-ups may be offered at a patient's residence.
