7. Who is a General Physician?

A general physician (GP) is a medical doctor specializing in non-surgical adult healthcare. GPs treat various diseases not requiring surgery, encompassing cardiovascular, respiratory, neurological, hematological, endocrine, and gastrointestinal systems. Some GPs may further specialize within these areas.

8. What are the education requirements to become a General Physician?

General physicians, also known as primary care physicians, require completion of medical school followed by a 3-year residency in primary care. Prerequisites include a science-based bachelor's degree, a minimum GPA, and successful completion of medical school and basic medical training. The commitment involves dedicated training during the residency program.

9. When should I consult a General Physician?

A general physician is your first point of contact for most health concerns. They treat various non-surgical conditions affecting the cardiovascular, respiratory, musculoskeletal, neurological, gastrointestinal, and endocrine systems. Consult a general physician for symptoms related to these systems.
